SUMMARY

Machine Learning and Data professional with hands-on experience developing predictive models, intelligent applications, and data-driven solutions using Python and modern machine learning tools. Skilled in machine learning, deep learning, computer vision, NLP, data analysis, and model development, with practical experience taking projects from data preparation through modelling, evaluation, and application. Eager to grow in a structured and dynamic environment, contribute through strong problem-solving skills, and apply technical expertise to create practical and impactful solutions.

SKILLS

Programming Languages: Python | SQL | R

Data Science: Pandas | NumPy | Scikit-learn | Matplotlib | Seaborn | Feature Engineering | EDA

Machine Learning: Supervised Learning | Regression | Classification | Clustering | Time Series | Feature Engineering | Model Selection | Cross-Validation | Hyperparameter Tuning | Model Evaluation | XGBoost | LightGBM | CatBoost

Deep Learning & NLP: TensorFlow | PyTorch | CNNs | NLP | BERT/LLM Fundamentals

Computer Vision: OpenCV | YOLOv8/Ultralytics | EasyOCR | Image Processing | Object Detection | OCR

ML Applications & APIs: Streamlit | Flask | FastAPI | Model Integration

Development Tools & Platforms: Git | GitHub | Jupyter | Google Colab | Kaggle | Zindi | VS Code | PyCharm

Additional: Power BI | Problem Solving | Critical Thinking | Communication | Teamwork

PROFESSIONAL EXPERIENCE

Freelance Machine Learning / Data Professional | Remote (Fiverr, Upwork) *Jan 2024 - Present*

- Develop predictive machine-learning solutions for sales forecasting, customer churn, customer segmentation, and customer lifetime value using Python and Scikit-learn.
- Prepare and transform datasets for modelling through data cleaning, feature engineering, exploratory analysis, and validation using Pandas and NumPy.
- Train, evaluate, and compare machine-learning models using algorithms including XGBoost, LightGBM, CatBoost, and Logistic Regression for practical predictive applications.
- Develop NLP workflows for text and sentiment analysis, applying data preprocessing and machine-learning techniques to extract insights from unstructured text.
- Develop interactive ML applications with Streamlit, translating modelling workflows into practical interfaces for demonstration and end-user interaction.

Intern Data Analyst | JIT Solutions, Akure, Nigeria *Sep 2023 – Dec 2023*

- Automated reporting workflows and developed forecasting dashboards, reducing report turnaround time by 35%.
- Analysed operational datasets and performance metrics to identify trends, patterns, and opportunities for improved business intelligence.
- Collaborated with senior analysts to improve the accuracy and consistency of analytical and reporting outputs.
- Presented data-driven findings to management, translating analytical results into clear insights to support operational and strategic decision-making.

PROJECTS

License Plate Detection & OCR: Developed an end-to-end computer-vision application using YOLOv8, OpenCV, and EasyOCR for license-plate detection and text recognition, integrated through Streamlit.

Customer Churn Prediction: Developed a classification model using Logistic Regression and SHAP-based interpretability to predict customer churn, achieving 88% accuracy on the project dataset.

Customer Lifetime Value Prediction: Applied RFM-based feature engineering and XGBoost to predict customer lifetime value and identify high-value customer segments.

EDUCATION

JIT Solutions - Ondo State, Nigeria *Jul 2023 – Dec 2023*

Diploma, Computer Science (Data Science Focus)

- **Key Coursework**: Marching Learning, Data Analysis, Programming

ADDITIONAL INFORMATION

- **Languages:** English, Yoruba
- **Certifications:** IBM Data Science Professional Certificate (2024), Data Analytics - DataCamp (2023), SQL for Analysis - Udemy (2023), Google Data Analytics (In Progress)
- **Volunteering**: Data Volunteer – Zindi Africa (Supported NGOs with dashboards), Tech Mentor - Local Bootcamp (Guided beginners in Python and ML projects)
